

COVID-19 Guide

Adjustments to Transplant Program and OPO Evaluation Metrics

The Scientific Registry of Transplant Recipients (SRTR), under contract from the Health Resources and Services Administration (HRSA), is charged with evaluating the performance of the nation's transplant system through publication of semi-annual transplant program-specific reports (PSRs) and organ procurement organization (OPO)-specific reports (OSRs). These reports contain performance metrics covering various time periods. For OPOs, these metrics include deceased donor organ yield. For transplant programs, they include pre-transplant mortality rates (formerly called waitlist mortality rates), transplant rates, organ offer acceptance rates, patient mortality after listing, and 1-month, 90-day, 1-year, 1-year conditional on 90-day, and 3-year posttransplant outcomes including graft survival and patient survival.

In response to the current global pandemic, SRTR modified the evaluation metrics for transplant programs and OPOs for the reports released in January 2021, July 2021, January 2022, July 2022, January 2023, July 2023, January 2024, July 2024 and January 2025. These reports made adjustments to transplant program and OPO performance metrics so that data during the time around the declaration of a national public health emergency on March 13, 2020, were not included in the metrics.

Modifications for the July 2025 reporting cycle were considered at the Analytic Methods Subcommittee of the SRTR Review Committee (SRC) at its meeting on March 24, 2021, and the full SRC meetings April 27, 2021 and on January 11, 2022. Both the Analytic Methods Subcommittee and the full SRC recommended an ongoing carve out of the first quarter of the pandemic (March 13, 2020 through June 12, 2020) from adjusted performance metrics, as detailed below. These recommendations were reviewed by HRSA's Division of Transplantation, which oversees SRTR. HRSA approved these recommendations, which SRTR will implement for the July 2025 reporting cycle. These changes will remain in force beyond the July 2025 reporting cycle, unless otherwise amended:

Posttransplant Outcomes (including 1-month, 90-day, 1-year, 1-year conditional on 90-day, and 3-year graft and patient survival): Evaluation cohorts will exclude transplants performed between March 13, 2020 and June 12, 2020, inclusive of March 13 and June 12. Patients given transplants before March 13, 2020 will have follow-up censored on March 12, 2020. Patients given transplants after June 12, 2020 will resume normal follow-up. Follow-up will not resume for patients given transplants before March 13, 2020 who are alive with function on June 12, 2020; however, this may be reconsidered as SRTR continues to explore moving to a period-prevalent methodology:

1-month, 90-day, 1-year & 1-year conditional on 90-day Patient and Graft Survival Evaluations: Transplants 1/1/2022-6/30/2024, follow-up through 12/31/2024.

3-year Patient and Graft Survival Evaluations: Transplants 7/1/2019-3/12/2020, follow-up through 3/12/2020. Transplants 6/13/2020-12/31/2021; follow-up through 12/31/2024.

Pre-Transplant Mortality Rate (formerly called Waitlist Mortality Rate): These evaluations are based on normal reporting cohorts.

Days after listing (and before transplant) between 1/1/2023 and 12/31/2024.

COVID-19 Guide

Transplant Rate: These evaluations are based on normal reporting cohorts.

Candidates on the waitlist 1/1/2023-12/31/2024.

Overall Rate of Mortality After Listing: These evaluations are based on normal reporting cohorts.

Evaluation period: 1/1/2023-12/31/2024.

Offer Acceptance Rate: These evaluations are based on normal reporting cohorts.

Offers received 1/1/2024-12/31/2024.

These decisions will apply to the evaluations released in the SRTR's semi-annual program-specific reports scheduled for release on July 8, 2025. These changes have been communicated to the leadership of the Organ Procurement and Transplantation Network's (OPTN) Membership and Professional Standards Committee (MSPC). These decisions will then be re-evaluated as more information becomes available in preparation for the release scheduled for January 2026.

As with the January 2025 reports, SRTR will continue to report descriptive data beyond March 12, 2020, e.g., waitlist counts, transplant counts, recipient characteristics, donor counts, donor characteristics, etc., but will alter data for performance evaluation metrics as described above.

User Guide

This report contains a wide range of useful information about the kidney-pancreas transplant program at Ascension St. Vincent Hospital. The report has three main sections:

- A. Program Summary
- B. Waiting List Information
- C. Transplant Information

The Program Summary is a one-page summary highlighting characteristics of the program, including the number of candidates on the waiting list, the number of transplants performed at the program, the number of patients being cared for by the program, and patient outcomes, including outcomes while on the waiting list (the transplant rate and the death rate while on the waiting list) and outcomes after transplant (patient and graft survival probabilities). If the program performed transplants in both adults and children, survival probabilities for adults and children (pediatrics) are provided separately. For each of the outcomes measures presented, a comparison is provided showing what would be expected at this program if it were performing as similar programs around the country perform when treating similar patients. More details regarding these outcome measures are provided in Sections B and C of the report.

The Waiting List Information section contains more detailed information on how many candidates are on the waiting list at the program, the types of candidates on the waiting list, how long candidates typically have to wait for a transplant at this program, how frequently candidates successfully receive a transplant, and how often candidates on the waiting list die before receiving a transplant.

Table B1 shows the activity on this program's waiting list during two recent 1-year periods and provides comparisons to all programs within this program's OPTN region (see <http://optn.transplant.hrsa.gov/members/regions.asp> for information on OPTN regions) and the nation as a whole. Tables B2 and B3 describe the candidates on the waiting list at this program, with comparisons to candidates waiting in the same donor service area (OPO/DSA) the OPTN region, and the nation as a whole.

Table B4 shows how many candidates were removed from the waiting list because they received a transplant. The program's transplant rate is calculated as the number of candidates who received a transplant divided by the person-years observed at the program (person-years is a combination of how many candidates were on the waiting list along with how long each candidate was followed since some candidates are not on the waiting list for the entire year). The transplant rate and comparisons to what would be expected at this program are presented in Figures B1 and B2. Figure B1 shows the transplant rate compared to what was expected at this program. The expected transplant rate is an estimate of what we would expect at this program if it were performing transplants at rates similar to other programs in the US with similar candidates on their waiting lists. The expected rate is only an estimate, and is made with a certain level of uncertainty. This uncertainty is shown in Figure B2. Figure B2 displays the ratio of the observed to the expected transplant rate. A ratio of 1 indicates that the observed transplant rate was equal to the expected transplant rate, while a ratio less than 1 indicates the observed rate was lower than expected rate and a ratio greater than 1 indicates the observed rate was higher than the expected rate. However, the level of uncertainty must be considered when interpreting these numbers. The 95% interval is also shown on Figure B2. This interval provides a range within which the true ratio of observed to expected transplant rates is likely to be. If this

User Guide

confidence interval includes (crosses) 1.0, then we cannot say that this program's observed transplant rate is different from what would be expected. This program did have any registered waiting list candidates relevant to transplant rate calculations during 01/01/2023-12/31/2024. Transplant rates are also provided for adult and pediatric patients separately along with comparisons to adult and pediatric rates in the DSA, the OPTN region, and the nation. Please refer to the PSR Technical Methods documentation available at <http://www.srtr.org> for more detail regarding how expected rates are calculated.

The pre-transplant mortality rate (previously called the waiting list mortality rate) for candidates on the waiting list is presented in Table B5 and Figures B4-B6. These data are presented in the same way as the transplant rate data in the previous section. The intent of this table and figures is to describe risk of death once candidates are listed rather than while they are listed, but before they are transplanted. Therefore, time at risk and deaths after removal from the waiting list for reasons other than transplant, transfer to another transplant program, or recovery (no longer needing a transplant), and before any subsequent transplant, are included. As with transplant rates, mortality rates should be interpreted carefully taking into consideration the interval displayed in Figure B5. For a complete description of how observed and expected mortality rates are calculated, please refer to the technical documentation available at <http://www.srtr.org>.

Survival from listing is presented in Table B6 and Figures B7-B9. These data are presented in the same way as the pre-transplant mortality rate data in the previous section. The intent of this table and figures is to describe risk of death once candidates are listed rather than while they are listed, including after a transplant. As with transplant rates, mortality rates should be interpreted carefully taking into consideration the interval displayed in Figure B8. For a complete description of how observed and expected mortality rates are calculated, please refer to the technical documentation available at <http://www.srtr.org>.

Table B7 presents information on what happens to candidates on the waiting list by three different time points after listing: 6 months, 12 months, and 18 months. The table displays percentages of candidates who have died, been removed from the waiting list, been transplanted, or been transferred or lost-to-follow-up. Tables B8 and B9 provide more detail regarding how many candidates have received a deceased donor transplant by certain time points during the first 3 years after being put on the transplant waiting list. Each row of Tables B8 and B9 presents the percent of candidates who received a deceased donor transplant by each time point. Table B10 presents data on the time it took for different percentages of patients to be transplanted for candidates added to the list between 01/01/2019 and 06/30/2024. The time it took for 5% (the 5th percentile) of patients to receive a transplant at this program was months. If "Not Observed" is displayed in the table, then too few candidates received transplants before 12/31/2024 to calculate a particular percentile of transplant times.

Table B11 contains a summary of the offer acceptance practices of the program. The offer acceptance ratio indicates whether the program is more or less likely to accept offers than the average program. If the offer acceptance ratio is greater than 1.0, then the program tends to accept more offers than average; if the offer acceptance ratio is less than 1.0, then the program tends to accept fewer offers than average. Figure B10 shows the distribution of program offer acceptance rates as well as the offer acceptance rate for this program. Figures B11 - B15 similarly show offer acceptance rates for subsets

User Guide

of offers.

The Transplant Information section begins with descriptions of transplant recipients in Tables C1 and C2. Data on recipients of deceased donor transplants are presented (Tables C1D and C2D); if applicable, data on recipients of living donor transplants are presented separately (Tables C1L and C2L). Comparisons to the region and the nation as a whole are provided. A description of the deceased donors used at this program is provided in Table C3D, along with characteristics of living donors in Table C3L, if applicable. Finally, information on the transplant procedure for deceased and living donor transplants is presented in Tables C4D and C4L, respectively.

Starting with Table C5, transplant outcomes are presented along with comparisons to what would be expected at this program and what happened in the nation as a whole. Tables C5-C14 (tables C5-C10 for Pancreas) present information on graft survival (survival of the transplanted organ), with data presented separately for adult and pediatric recipients. Patients are followed from the time of transplant until either failure of the transplanted organ or death, whichever comes first. Please refer to the technical methods for more information on these calculations (<http://www.srtr.org>).

While Tables C5-C14 present data on graft survival, Tables C15-C20 (tables C11-C20 for Pancreas) present information on patient survival. For these tables, patients are followed from the time of transplant until death, regardless of whether the transplant is functioning or the patient required another transplant to survive.

Tables C21 and C22 summarize the multiorgan transplant outcomes at this program. The summary statistics in these tables are descriptive and are not risk-adjusted for different donor and candidate characteristics.

Additional information regarding the technical methods and the risk adjustment models used to estimate expected event rates is available on the SRTR website at <http://www.srtr.org>. We welcome and encourage feedback on these reports. Please feel free to share feedback with the SRTR at the following e-mail: srtr@srtr.org.

Table B5. Pre-transplant mortality rates: 01/01/2023 - 12/31/2024

This center did not have any registered
waiting list candidates relevant to
this table during
01/01/2023-12/31/2024

Figure B4. Observed and expected pre-transplant mortality rates: 01/01/2023 - 12/31/2024

This center did have any registered
waiting list candidates relevant to
this figure during
01/01/2023-12/31/2024

Figure B6. Observed adult (18+) and pediatric (<18) pre-transplant mortality rates: 01/01/2023 - 12/31/2024

This center did have any registered
waiting list candidates relevant to
this figure during
01/01/2023-12/31/2024

Figure B5. Pre-transplant mortality rate ratio estimate

This center did have any registered
waiting list candidates relevant to
this figure during
01/01/2023-03/12/2020

B. Waiting List Information

Table B6. Rates of patient mortality after listing: 01/01/2023 - 12/31/2024

Waiting List Registrations	This Center	OPO/DSA	Region	U.S.
All Patients				
Count at risk during the evaluation period	5	168	500	9,553
Person-years*	7.4	237.7	699.6	13,268.4
Number of Deaths	0	3	13	457
Adult (18+) Patients				
Count at risk during the evaluation period	5	168	500	9,546
Person-years*	7.4	237.7	699.6	13,259.6
Number of Deaths	0	3	13	456
Pediatric (<18) Patients				
Count at risk during the evaluation period	0	0	0	7
Person-years*	0.0	0.0	0.0	8.9
Number of Deaths	0	0	0	1

Since candidates listed for combined liver-intestine transplants are also often listed for a pancreas for vascular continuity, candidates simultaneously listed for intestine transplants are not included in this table.

* Person-years are calculated as days (converted to fractional years). The number of days from 01/01/2023, or from the date of first wait listing until death, reaching 5 years after listing or December 31, 2024.

** Patient mortality after listing describes the relative survival experience of patients after listing. It depends on many factors, some of which are outside of the control of the transplant program. For example, availability of organs may not be the same in every part of the country.

Figure B7. Observed and expected rates of patient mortality after listing: 01/01/2023 - 12/31/2024

Figure B9. Observed adult (18+) and pediatric (<18) rates of patient mortality after listing: 01/01/2023 - 12/31/2024

Figure B8. HR estimate of patient mortality after listing

B. Waiting List Information

Table B7. Waiting list candidate status after listing

Candidates registered on waiting list between 07/01/2022 and 06/30/2023

**This center did not register any
waiting list candidates relevant to
this table during
07/01/2022-06/30/2023**

B. Waiting List Information

Table B8. Percent of candidates with deceased donor transplants: demographic characteristics
Candidates registered on the waiting list between 01/01/2019 and 12/31/2021

Characteristic	Percent transplanted at time periods since listing									
	This Center					United States

Unknown*	0	--	--	--	--	0	--	--	--	--	
Years Since Diabetes Onset											
0-20	0	--	--	--	--	1,339	10.2	45.8	57.7	61.9	
20-30	4	0.0	0.0	0.0	0.0	1,719	11.1	44.6	55.7	60.4	
30 +	1	0.0	0.0	0.0	0.0	893	10.9	44.6	56.3	61.6	
Unknown	0	--	--	--	--	202	20.3	50.5	61.9	65.3	

* cPRA is calculated from unacceptable antigens. "Unknown" indicates no unacceptable antigens have been entered. For the purpose of the risk-adjustment models, unknown cPRA is treated as cPRA = 0.

B. Waiting List Information

Table B10. Time to transplant for waiting list candidates*

Candidates registered on the waiting list between 01/01/2019 and 06/30/2024

Percentile	Center	Months to Transplant**		U.S.
		OPO/DSA	Region	
5th		0.3	0.5	0.4
10th		0.6	1	0.9
25th		1.6	3.6	3.3
50th (median time to transplant)		7.1	10.8	13.5
75th		32.5	Not Observed	Not Observed

* If cells contain "Not Observed" fewer than that percentile of patients had received a transplant. For example, the 50th percentile of time to transplant is the time when 50% of candidates have received transplants. If waiting times are long, then the 50th percentile may not be observed during the follow-up period for this table. Also, if more than 50% of candidates are removed from the list due to death or other reasons before receiving transplants, then the 50th percentile of time to transplant will not be observed.

** Censored on 12/31/2024. Calculated as the months after listing, during which the corresponding percent of all patients initially listed had received a transplant.

B. Waiting List Information

Table B11. Offer Acceptance Practices: 01/01/2024 - 12/31/2024

**This program did not receive any offers for wait listed candidates
relevant to this table during 01/01/2024-12/31/2024**

Table C5DKI. Adult (18+) 1-month survival with a functioning deceased donor kidney graft
SPK transplants performed between 01/01/2022 and 06/30/2024
Deaths and retransplants are considered graft failures

This center did not perform any
transplants relevant to
this table during
01/01/2022-06/30/2024

**Figure C1DKI. Adult (18+)
1-month deceased donor kidney
graft failure HR estimate**

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

**Figure C2DKI. Adult (18+) 1-month deceased donor kidney
graft failure HR program comparison**

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

C. Transplant Information

Table C6DKI. Adult (18+) 1-year survival with a functioning deceased donor kidney graft

SPK transplants performed between 01/01/2022 and 06/30/2024

Deaths and retransplants are considered graft failures

This center did not perform any
transplants relevant to
this table during
01/01/2022-06/30/2024

Figure C3DKI. Adult (18+) 1-year deceased donor kidney graft failure HR estimate

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

Figure C4DKI. Adult (18+) 1-year deceased donor kidney graft failure HR program comparison

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

C. Transplant Information

Table C7DKI. Adult (18+) 3-year survival with a functioning deceased donor kidney graft

SPK transplants performed between 07/01/2019 and 03/12/2020, and 06/13/2020 and 12/31/2021

Deaths and retransplants are considered graft failures

Follow-up ends on 3/12/2020 for recipients transplanted prior to 3/13/2020

This center did not perform any
transplants relevant to
this table during
07/01/2019-12/31/2021

Figure C5DKI. Adult (18+) 3-year deceased donor kidney graft failure HR estimate

This center did not perform any
transplants relevant to
this figure during
07/01/2019-12/31/2021

Figure C6DKI. Adult (18+) 3-year deceased donor kidney graft failure HR program comparison

This center did not perform any
transplants relevant to
this figure during
07/01/2019-12/31/2021

C. Transplant Information

Table C8DKI. Pediatric (<18) 1-month survival with a functioning deceased donor kidney graft
SPK transplants performed between 01/01/2022 and 06/30/2024
Deaths and retransplants are considered graft failures

This center did not perform any
transplants relevant to
this table during
01/01/2022-06/30/2024

Figure C7DKI. Pediatric (<18)
1-month deceased donor kidney
graft failure HR estimate

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

Figure C8DKI. Pediatric (<18) 1-month deceased donor kidney
graft failure HR program comparison

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

C. Transplant Information

Table C9DKI. Pediatric (<18) 1-year survival with a functioning deceased donor kidney graft
SPK transplants performed between 01/01/2022 and 06/30/2024
Deaths and retransplants are considered graft failures

This center did not perform any
transplants relevant to
this table during
01/01/2022-06/30/2024

**Figure C9DKI. Pediatric (<18)
1-year deceased donor kidney
graft failure HR estimate**

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

**Figure C10DKI. Pediatric (<18) 1-year deceased donor kidney
graft failure HR program comparison**

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

C. Transplant Information

Table C10DKI. Pediatric (<18) 3-year survival with a functioning deceased donor kidney graft

SPK transplants performed between 07/01/2019 and 03/12/2020, and 06/13/2020 and 12/31/2021

Deaths and retransplants are considered graft failures

Follow-up ends on 3/12/2020 for recipients transplanted prior to 3/13/2020

This center did not perform any
transplants relevant to
this table during
07/01/2019-12/31/2021

**Figure C11DKI. Pediatric (<18)
3-year deceased donor kidney
graft failure HR estimate**

This center did not perform any
transplants relevant to
this figure during
07/01/2019-12/31/2021

**Figure C12DKI. Pediatric (<18) 3-year deceased donor kidney
graft failure HR program comparison**

This center did not perform any
transplants relevant to
this figure during
07/01/2019-12/31/2021

C. Transplant Information

Table C11D. Adult (18+) 1-month patient survival (deceased donor graft recipients)
SPK transplants performed between 01/01/2022 and 06/30/2024
Retransplants excluded

This center did not perform any
transplants relevant to
this table during
01/01/2022-06/30/2024

Figure C13D. Adult (18+) 1-month
patient death HR estimate
(deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

Figure C14D. Adult (18+) 1-month patient death HR program
comparison (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

C. Transplant Information

Table C12D. Adult (18+) 90-Day patient survival (deceased donor graft recipients)
SPK transplants performed between 01/01/2022 and 06/30/2024
Retransplants excluded

This center did not perform any
transplants relevant to
this table during
01/01/2022-06/30/2024

Figure C15D. Adult (18+) 90-Day
patient death HR estimate
(deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

Figure C16D. Adult (18+) 90-Day patient death HR program
comparison (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

C. Transplant Information

Table C13D. Adult (18+) 1-year patient survival (deceased donor graft recipients)
SPK transplants performed between 01/01/2022 and 06/30/2024
Retransplants excluded

This center did not perform any
transplants relevant to
this table during
01/01/2022-06/30/2024

Figure C17D. Adult (18+) 1-year
patient death HR estimate
(deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

Figure C18D. Adult (18+) 1-year patient death HR program
comparison (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

C. Transplant Information

Table C14D. Adult (18+) 1-year Conditional patient survival (deceased donor graft recipients)
SPK transplants performed between 01/01/2022 and 06/30/2024
Retransplants excluded

This center did not perform any
transplants relevant to
this table during
01/01/2022-06/30/2024

Figure C19D. Adult (18+) 1-year
Conditional patient death HR
estimate (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

Figure C20D. Adult (18+) 1-year Conditional patient death HR
program comparison (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

C. Transplant Information

Table C15D. Adult (18+) 3-year patient survival (deceased donor graft recipients)

SPK transplants performed between 07/01/2019 and 03/12/2020, and 06/13/2020 and 12/31/2021

Retransplants excluded

Follow-up ends on 3/12/2020 for recipients transplanted prior to 3/13/2020

This center did not perform any
transplants relevant to
this table during
07/01/2019-12/31/2021

Figure C21D. Adult (18+) 3-year patient death HR estimate (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
07/01/2019-12/31/2021

Figure C22D. Adult (18+) 3-year patient death HR program comparison (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
07/01/2019-12/31/2021

C. Transplant Information

Table C16D. Pediatric (<18) 1-month patient survival (deceased donor graft recipients)
SPK transplants performed between 01/01/2022 and 06/30/2024
Retransplants excluded

This center did not perform any
transplants relevant to
this table during
01/01/2022-06/30/2024

Figure C23D. Pediatric (<18)
1-month patient death HR
estimate (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

Figure C24D. Pediatric (<18) 1-month patient death HR
program comparison (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

C. Transplant Information

Table C17D. Pediatric (<18) 90-Day patient survival (deceased donor graft recipients)
SPK transplants performed between 01/01/2022 and 06/30/2024
Retransplants excluded

This center did not perform any
transplants relevant to
this table during
01/01/2022-06/30/2024

Figure C25D. Pediatric (<18)
90-Day patient death HR estimate
(deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

Figure C26D. Pediatric (<18) 90-Day patient death HR
program comparison (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

C. Transplant Information

Table C18D. Pediatric (<18) 1-year patient survival (deceased donor graft recipients)

SPK transplants performed between 01/01/2022 and 06/30/2024

Retransplants excluded

This center did not perform any
transplants relevant to
this table during
01/01/2022-06/30/2024

Figure C27D. Pediatric (<18) 1-year patient death HR estimate (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

Figure C28D. Pediatric (<18) 1-year patient death HR program comparison (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

C. Transplant Information

Table C19D. Pediatric (<18) 1-year Conditional patient survival (deceased donor graft recipients)
SPK transplants performed between 01/01/2022 and 06/30/2024
Retransplants excluded

This center did not perform any
transplants relevant to
this table during
01/01/2022-06/30/2024

Figure C29D. Pediatric (<18)
1-year Conditional patient death
HR estimate (deceased donor
grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

Figure C30D. Pediatric (<18) 1-year Conditional patient death
HR program comparison (deceased donor grafts)

This center did not perform any
transplants relevant to
this figure during
01/01/2022-06/30/2024

C. Transplant Information
